## PRESENTING WITH IMPACT

### About the trainer:

Since 2008 I've taught hundreds of expats and Dutch professionals to present in an effective manner. From Russians, Croatians, to Brazilians and Chinese. For me it is a true feast to train people from all around the world.

I believe in the power of sharing your information or ideas to improve the world. And the ultimate way of doing this is through presenting. How to metaphorically let your information or idea be the drop that falls in the water and creates a wave? If only a little one ;-).

It is my mission to teach as many people as possible to attain this. So that, your information does not stay with you, but actually spreads. Because then, things start to happen. Minds are transported, ideas pop up, interaction is stimulated and ideas get adopted.

For years I worked as an IT consultant for an US Software Company. Giving lots of presentations and workshops throughout Europe. Here I learned, by trial and error, to bring my message across in a successful way to an international audience.

During my study, I spent one year at the Wittenberg University in the US, where giving presentations is much more an integral part of education than it is in the Netherlands. In the Netherlands I've graduated from the University of Amsterdam in European Studies (main subject: English).

These experiences coupled with a one-year hands-on "train-the-trainer" education that I followed in 2008, makes, that I not only have the experience, but also the "know how" of **how to teach skills**. So that my participants can make a big leap ahead in presenting in a practical, easy, step by step manner.

My hobby improvisation theatre also contributes to my work as a presentation skills teacher. Theatre teaches me, what makes something interesting to watch and listen to and how you can keep the attention of your public.
